

Prof. RNDr. Martin Kružík, Ph.D., DSc.

Institute of Information Theory
and Automation (ÚTIA)
Czech Academy of Sciences
Pod vodárenskou věží 4
182 00 Praha 8
Czech Republic

e-mail: kruzik@utia.cas.cz
web: <http://staff.utia.cas.cz/kruzik>
phone: +420-266-052-395

Education/Career

2023	Full Professor of Mathematics (appointed by the President of the Czech Republic on May 18)
2018	Doctor of Sciences, Czech Academy of Sciences
2014	Habilitation in mathematical analysis, Charles University, Prague, Czech Republic
2007	Privatdozent (Priv.-Doz.) in mathematics, Technical University, Munich, Germany
2006	Habilitation in mathematics (Dr. habil.), Technical University, Munich, Germany
1997	Ph.D. in mathematics, Charles University, Prague Dissertation: Oscillations, Concentrations and Microstructure Modeling (advisor: prof. Tomáš Roubíček)
1993	M.Sc. in mathematics, Charles University, Prague Thesis: Variational Methods in Multipolar Elasticity (advisor: prof. Jindřich Nečas)

Scientific interests/background

calculus of variations, convex compactifications, mathematical and numerical modeling in material science, nonlinear elasticity, magnetoelasticity, optimal control theory, partial differential equations, relaxation methods in the calculus of variations and optimal control theory, Young measures and their generalizations

Work experience

10/1993–now	Institute of Information Theory and Automation, Academy of Sciences of the Czech Republic, Prague, since 2004 head of the Department of Decision-Making Theory
-------------	--

04/2005–now	Department of Physics, Faculty of Civil engineering, Czech Technical University, Prague, research associate (part time)
2000 and 2002	Center of Advanced European Studies and Research (caesar), Bonn, Germany, research associate
2001	Center of Mathematical Sciences, University of Technology, Munich, Germany, research associate
10/1998–09/1999	Max-Planck-Institute for Mathematics in the Sciences, Leipzig, Germany, postdoctoral associate
10/1997–03/1998	School of Mathematics, University of Minnesota, Minneapolis, postdoctoral associate and visiting assistant professor
09/1996–06/1997	Institute for Mathematics and Its Application, University of Minnesota, Minneapolis, Fulbright’s fellow

Teaching Experience

2 Bc. students, 5 diploma students, 2 Ph.D students

Member of the doctoral committee 4F11 (Mathematical modeling) at the Faculty of Mathematics and Physics, Charles University.

Participation at Selected Grant projects

- 2022-2023 Rigorous derivation of linearized models in thermomechanics. AV ČR–DAAD (German PI: Prof. M. Friedrich) (Czech PI)
- 2022-2023 Modeling, analysis, and simulation of magnetoelastic materials. MŠMT-WTZ (Austria) (Austrian PI Dr. M. Ruggeri) (Czech PI)
- 04/2021-03/2024 Scales and shapes in continuum thermomechanics. GAČR-FWF (Austrian PI Prof. U. Stefanelli) (Czech PI)
- 2021-2022 Model reduction and optimal control in thermomechanics. MŠMT-WTZ (Austria) (team member)
- 2020-2022 Hadamard-in-the-mean: a new and useful class of inequalities in the calculus of variations. Royal society international joint project (Czech PI) (GB PI: Prof. J. Bevan, U of Surrey)
- 2019-2020 Mathematical Frontiers in Large Strain Continuum Mechanics MŠMT-WTZ (Austrian PI: Prof. E. Davoli) (Czech PI)
- 2020-2021 Solving nonconvex calculus of variations problems with the Lasserre hierarchy. MŠMT mobility (French PI: Prof. D. Henrion) (Czech PI)

- 2019-2021 Large Strain Challenges in Materials Science GAČR-FWF (Austrian PI: Prof. E. Davoli) (Czech PI)
- 2018-2020 Localization phenomena in shape memory alloys: experiments & modeling GAČR (CoPI)
- 2017-2019 Advanced mathematical methods for dissipative evolutionary systems GAČR (PI)
- 2016-2017 Non-interpenetration of matter and discrete-to-continuum passages in nonlinear elasticity. AV ČR–DAAD (German PI: Prof. A. Schlömerkemper) (Czech PI)
- 2016-2017 Thermomechanics of Solids: Modeling, Analysis, and Simulations, MŠMT-WTZ (Austrian PI: Prof. U. Stefanelli) (Czech PI)
- 2016-2018 Variational structures in thermomechanics of solids GAČR-FWF (Austrian PI: Prof. U. Stefanelli) (Czech PI)
- 2014-2016 Experimentally justified multiscale modeling of shape memory alloys GA ČR (CoPI)
- 2013-2014 Semidefinite programming for nonconvex problems of calculus of variations and optimal control AVČR–CNRS (French PI: Prof. D. Henrion) (Czech PI)
- 2013-2015 Computational modeling of damage and transport processes in quasi-brittle materials GA ČR (team member)
- 2013-2014 Integral functionals: Weak lower semicontinuity along oscillating/concentrating sequences under differential constraints, AV ČR–DAAD (German PI: Dr. S.Krömer) (Czech PI)
- 2012-2015 A mechanism of ultra-fine substructure formation induced by severe plastic deformation GA ČR (team member)
- 2012-2014 Variational and numerical analysis in nonsmooth mechanics, GA ČR (team member)
- 2011-2013 Computational and theoretical methods for nonlinear material models with uncertain parameters, GA ČR (team member)
- 2010–2014 Modern mathematical and computer models for inelastic processes in solids, GA ČR (CoPI)
- 2009–2011 Analysis of rate-independent elasto-plasticity and applications in biomechanics, Royal society international joint project (GB PI: Prof. J. Zimmer, U of Bath) (Czech PI)
- 2008–2011 Nonsmooth and set-valued analysis in mechanics and thermomechanics GA AV ČR (team member)
- 2004–2008 Multi-scale modelling and characterisation for phase transformations in advanced materials - MULTIMAT, Marie Curie Research Training Network (team member)

- 2004–2007 Variational analysis of nonsmooth problems of mathematical physics, GA AV ČR (team member)
- 2000–2003 Variational problems in nonsmooth mathematical physics: theory and applications, GA AV ČR (team member)
- 1996–1998 Nonsmooth analysis in problems of continuum mechanics, GA AV ČR (team member)

Selected international cooperations

CNRS Toulouse; University of Erlangen; University of Freiburg; University of Würzburg; University of Vienna; TU Vienna, University of Salerno; University of Münster, University Roma Tre; University of Firenze; University of Milano.

Honors and Awards

01/2022–02/2022	Senior Research Fellow, The Erwin Schrödinger Intl. Inst. for Mathematics and Physics
summer semester 2015/16	Giovanni-Prodi Guest Professorship, University of Würzburg
11/2014	visiting professorship, University of Würzburg
2003	Otto Wichterle Award
2002	Josef Hlávka's Prize
1996	Fulbright's Commission Fellowship

Other professional activities

2001–now	AMS reviewer occasional journal referee
2010–2011	Editorial board member: ISRN Mathematical Analysis
2012–now	Editorial board member: Kybernetika
2017	Guest co-editor <i>Discrete and Continuous Dynamical Systems-S</i>
2013–now	Member of The International Society for the Interaction of Mechanics and Mathematics (ISIMM)
2017–2020	Member of the Executive Committee of the ISIMM
2018–now	Member of the Board of Officers GAMM Activity Group Analysis of PDEs

Personal Data

Date of Birth March 17, 1970

Citizenship Czech Republic

February 18, 2024

List of M. Kružík's Publications
(ResearcherID: F-5548-2014)

Book

- [1] M. Kružík, T. Roubíček: *Mathematical Methods in Continuum Mechanics of Solids*. (Interaction of Mech. and Math. Series) Springer, Switzerland, 2019, pp.i-xiii, 1-617. ISBN 978-3-030-02064-4, ISSN 1860-6245, eBook ISBN 978-3-030-02065-1, DOI 10.1007/978-3-030-02065-1.

Articles in journals, proceedings, and preprints

- [1] Explicit characterization of L^p -Young measures (with T. Roubíček), *J. Math. Anal. Appl.* **198** (1996), 830–843.
- [2] On the measures of DiPerna and Majda (with T. Roubíček), *Mathematica Bohemica*, **122** (1997), 383–399.
- [3] Numerical approach to double well problems. *SIAM J. Num. Anal.* **35** (1998), 1833–1849.
- [4] DiPerna-Majda measures and uniform integrability., *Commentationes Math. Univ. Carolinae*, **39** (1998), 511–523.
- [5] Some geometric properties of sets of generalized Young functionals (with T. Roubíček), *Proc. Royal Soc. Edinburgh* **129A** (1999), 601–616.
- [6] On the composition of quasiconvex functions and the transposition, *J. Convex Anal.* **6** (1999), 207–213.
- [7] Numerical treatment of microstructure evolution modelling (with T. Roubíček), In: *ENUMATH 97*, Proc. 2nd European Conf. on Numer. Math. and Advanced Appl., Sept.28–Oct.3, 1997, Heidelberg (Eds. H.G.Bock et al.), World Scientific, Singapore, 1998, pp. 532–539.
- [8] Optimization problems with concentration and oscillation effects: relaxation theory and numerical approximation (with T. Roubíček), *Numer. Funct. Anal. Opt.* **20** (1999), 511–530.
- [9] Bauer's maximum principle and hulls of sets, *Calc. Var.* **11** (2000), 321–332.
- [10] Weierstrass-type maximum principle for microstructure in micromagnetics (with T. Roubíček), *Zeitschrift für Analysis u. ihre Anwendungen* **19** (2000), 415–428.
- [11] Young measure approximation in micromagnetics (with A. Prohl). *Num. Math.* **90** (2001), 291–307.
- [12] Microstructure evolution model in micromagnetics (with T. Roubíček). *Zeitschrift für Angewandte Math. u. Phys.* **55** (2004), 159–182.

- [13] Adaptive approximation algorithm for relaxed optimization problems (with T. Roubíček) In: Proceedings of “Fast Solutions of Discrete Optimization Problems” held in WIAS, Berlin, May 8–12, 2000, (Eds. V. Schulz, K.-H. Hoffmann and R.H.W. Hoppe), Birkhäuser, Basel, 2001, pp. 242–254.
- [14] Variational models for microstructure in shape memory alloys and in micromagnetics and their numerical treatment. In: *Communications of the Bexbach Colloquium on Science 2000, vol. II*. Proceedings of the conference held in Bexbach, Germany, October 27–29, 2000 (Eds. M. Robnik and A. Ruffing), Shaker Verlag, Aachen, 2003, pp. 20–38.
- [15] Quasiconvex extreme points of convex sets. In: *Elliptic and Parabolic Problems*, Proceedings of the 4th European Conference held in 2001 (Eds. J. Bemelmans et al.) World Scientific, Singapore 2002, pp. 145–151.
- [16] Maximum principle based algorithm for hysteresis in micromagnetics. *Adv. Math. Sci. Appl.* **13** (2003), 461–485.
- [17] Specimen shape influence on hysteretic response of bulk ferromagnets. (with T. Roubíček) *Journal of Magnetism and Magnetic Materials* **256** (2003), 158–167.
- [18] A note on equality of functional envelopes. *Mathematica Bohemica* **128** (2003), 169–178.
- [19] The computation of martensitic microstructure with piecewise laminates. (with M. Luskin) *J. Sci. Comp.* **19** (2003), 293–308.
- [20] Macroscopic modeling of magnetic hysteresis. (with A. Prohl) *Adv. Math. Sci. Appl.* **14** (2004), 665–681.
- [21] Mesoscopical model for ferromagnets with isotropic hardening. (with T. Roubíček) *Zeitschrift für Angewandte Math. u. Phys.* **56** (2005), 107–135.
- [22] Interactions between demagnetizing field and hardening-like effects in bulk ferromagnets. (with T. Roubíček) *Journal of Magnetism and Magnetic Materials* **277** (2004), 192–200.
- [23] A phenomenological model for hysteresis in polycrystalline shape memory alloys. (with F. Otto) *Zeit. Angew. Math. Mech.* **84** (2004), 835–842.
- [24] Periodicity properties of solutions to a hysteresis model in micromagnetics. In: *Numerical Mathematics and Advanced Applications*, Proceedings of ENUMATH 2003, the 5th European Conference on Num. Math. and Adv. Appl. held in Prague, August 2003. (Eds. M. Feistauer et al.) Springer, Berlin, 2004, pp. 605–614.
- [25] Periodic solutions to a hysteresis model in micromagnetics. *J. Convex Anal.* **13** (2006), 81–99.
- [26] Mesoscopic model of microstructure evolution in shape memory alloys, its numerical analysis and computer implementation. (with T. Roubíček). *GAMM Mitteilungen* **29** (2006), 192–214.

- [27] Rate-independent behavior of ferromagnets. *Proc. Appl. Math. Mech.* **4** (2004), 67–70. DOI 10.1002/pamm.200410017 .
- [28] Recent developments in modeling, analysis and numerics of ferromagnetism. (with A. Prohl). *SIAM Review* **48** (2006), 439–483.
- [29] Spherical load indetation in submicron NiTiCu shape memory thin films. (with R. Hassdorf, J. Feydt, S. Thienhaus, L. Buform, N. Conté, O. Pykhteev, N. Botkin, and M. Moske) In: *Proceedings of the 2004 Mater. Research Society Fall Meeting, Symposium on Fundamentals of Nanoindentation and Nanotribology III* held in Boston, MA, Nov. 29 – Dec. 2, 2004 (eds. D.F. Bahr, Y-T. Cheng, N. Huber, A.B. Mann, K.J. Wahl) **841** (2005) pp. R9.7.1-R9.7.6. (This paper is a Ribbon Award winner.)
- [30] On the control of an evolutionary equilibrium in micromagnetics. (with M. Kočvara and J.V. Outrata). In: *Optimization with Multivalued Mappings: Theory, Applications and Algorithms*, Series: Springer Optimization and Its Applications, vol. 2 (eds. S. Dempe, V. Kalashnikov), Springer 2006, ISBN: 0-387-34220-6, pp. 143–168.
- [31] Modelling of microstructure and its evolution in shape-memory-alloy single-crystals, in particular in CuAlNi. (with A. Mielke and T. Roubíček) *Meccanica* **40** (2005), 389–418.
- [32] Oscillations and concentrations in sequences of gradients. (with A. Kałamajska), *ESAIM: Control Optim. Calc. Var.* **14** (2008), 71–104.
- [33] Mechanisms controlling formation of the ultra-fine microstructure in severely deformed materials. (with J. Kratochvíl, R. Sedláček, and A. Sveshnikov). *Engineering Mechanics* **13** (2006), 261–270.
- [34] Probing superelasticity in NiTi-based shape memory thin films and foils.(with R. Hassdorf, J. Feydt, S. Thienhaus, L. Buform, N. Conté, O. Pykhteev, N. Botkin, and M. Moske) In: *Proceedings of the International Conference on Shape Memory and Superelastic Technologies* held in Baden-Baden, Germany, October 3–7, 2004.(eds. T.W. Duerig and A.R. Pelton), pp. 399–407, ASM International, Materials Park, OH, 2006.
- [35] Identification of Preisach-type hysteresis operators. (with J. Koutný, A. Kurdila, and T. Roubíček). *Numer. Funct. Anal. Opt.* **29** (2008), 149–160.
- [36] A mesoscopical model of shape-memory alloys. (with J. Koutný and T. Roubíček) *Proceedings of the Estonian Acad. Sci. Physics. Mathematics.* **56** (2007), 146–154.
- [37] Statistically based continuum model of dislocation cell structure formation. (with J. Kratochvíl and R. Sedláček). *Phys. Rev. B* **75** (2007), 064104 (14 pages).
- [38] On convergence of gradient-dependent integrands. *Applications of Math.* **52** (2007), 529–543.
- [39] Evolutionary problems with linear growth. (with J. Zimmer) *ESAIM: Control Optim. Calc. Var.* **16** (2010), 1–22. DOI:10.1051/cocv:2008060
- [40] Variational approach to formation of misoriented microstructures in plastic deformations (with J. Kratochvíl, R. Sedláček, and C. Krempaszky) *Proc. Appl. Math. Mech.* **7** 4080005-4080006 (2007).

- [41] A model of ultra-fine microstructure evolution in materials deformed by high pressure torsion. (with J. Kratochvíl and R. Sedláček). *Acta Materialia* **57** (2009), 739–748.
- [42] Energetic approach to strain gradient plasticity. (with J. Kratochvíl and R. Sedláček). *Zeit. Angew. Math. Mech.* **90** (2010), 122–135.
- [43] Energetic formulation of nonlocal crystal plasticity. (with J. Kratochvíl and R. Sedláček). *Int. J. Mat. Res.* **100** (2009), 340–341.
- [44] Oscillations and concentrations generated by \mathcal{A} -free mappings and weak lower semi-continuity of integral functionals. (with I. Fonseca) *ESAIM Control Optim. Calc. Var.* **16** (2010), 472–502.
- [45] Rate-independent processes with linear growth and time-dependent boundary conditions. (with J. Zimmer) *Discrete Cont. Dyn. Systems - S.* **5** (2012), 591–604.
- [46] A model of shape memory alloys accounting for plasticity. (with J. Zimmer) *IMA J. Appl. Math.* **76** (2011), 193–216.
- [47] Crystal plasticity model of shear and kink bands - energetic approach. (with J. Kratochvíl and R. Sedláček). *Phil. Mag.* **90** (2010), 3729–3742.
- [48] Variational model for martensitic thin films and its numerical treatment. (with G. Pathó). *Technische Mechanik* **30** (2010), 203–210.
- [49] On an extension of the space of bounded deformations. (with J. Zimmer). *Zeit. Analysis u. ihre Anwendungen* **31** (2012), 75–91.
- [50] Model of structural fragmentation induced by high pressure torsion. (with J. Kratochvíl and R. Sedláček). *Rev. Adv. Mat. Sci.* **25** (2010), 88–98.
- [51] Quasiconvexity at the boundary and concentration effects generated by gradients. *ESAIM Control Optim. Calc. Var.* **19** (2013), 679–700.
- [52] Instability origin of subgrain formation in plastically deformed materials. (with J. Kratochvíl and R. Sedláček). *Int. J. Engrg. Sci.* **48** (2010), 1401–1412.
- [53] A macroscopic model for magnetic shape-memory single crystals. (with U. Stefanelli and A.-L. Bessoud). *Zeit. Angew. Math. Phys.* **64** (2013), 343–359. DOI 10.1007/s00033-012-0223-y
- [54] Delamination and adhesive contact models and their mathematical analysis and numerical treatment. (with T. Roubíček and J. Zeman) In: *Math. Methods & Models in Composites* (Ed. V. Mantič), World Scientific, 2013, ISBN: 978-1-84816-785-8, pp. 349–400.
- [55] An efficient approach to the numerical solution of rate-independent problems with nonconvex energies. (with S. Bartels). *Multiscale Modeling & Simulation* **9** (2011), 1276–1300. <http://dx.doi.org/10.1137/110821718>.
- [56] Young measures supported on invertible matrices. (with B. Benešová and G. Pathó). *Appl. Anal.* **93** (2014), 105–123. doi:10.1080/00036811.2012.760039.

- [57] A thermodynamically-consistent mesoscopic model of the ferro/paramagnetic transition. (with B. Benešová and T. Roubíček). *Zeit. Angew. Math. Phys.* **64** (2013), 1–28. DOI 10.1007/s00033-012-0236-6.
- [58] Oscillations and concentrations in sequences of gradients up to the boundary. (with S. Krömer). *J. Convex Analysis* **20** (2013), 723–752.
- [59] Finite element approximation for time-dependent diffusion with measure-valued data. (with T.I Seidman, M.K. Gobbert, and D.W. Trott). *Num. Math.* **122** (2012), 709–723. DOI 10.1007/s00211-012-0474-8.
- [60] Modelling of wheat-flour dough mixing as an open loop hysteretic process. (with R.S. Anderssen). *Discrete Cont. Dyn. Systems - B* **18** (2013), 283–293.
- [61] Sequential weak continuity of null Lagrangians at the boundary. (with A. Kałamajska and S. Krömer). *Calc. Var. PDE* **49** (2014), 1263–1278.
- [62] Energetic approach to large strain gradient crystal plasticity. (with J. Kratochvíl). *Acta Polytechnica* **52**(6) (2012), 1–14.
- [63] Domain patterns and hysteresis in phase-transforming solids: analysis and numerical simulations of a sharp interface dissipative model via phase-field approximation. (with A. DeSimone). *Networks Heterog. Media* **8** (2013), 481–499. doi:10.3934/nhm.2013.8.481
- [64] Modeling of thin martensitic films with nonpolynomial stored energies. (with J. Zimmer). In: *Recent Trends in Dynamical Systems* - Springer Proceedings in Mathematics and Statistics **35** (eds. A. Johann, H.-P. Kruse, F. Rupp, S. Schmitz), Springer, 2013, pp. 587–608.
- [65] A mesoscopic thermomechanically-coupled model for thin-film shape-memory alloys by dimension reduction and scale transition. (with B. Benešová and G. Pathó). *Continuum Mech. Thermodyn.* **26** (2014), 683–713. doi: 10.1007/s00161-013-0323-8.
- [66] Quasistatic adhesive contact delaminating in mixed mode and its numerical treatment. (with C. Panagiotopoulos and T. Roubíček). *Math. Mech. Solids* **20** (2015), 582–599.
- [67] Characterization of gradient Young measures generated by homeomorphisms in the plane. (with B. Benešová) *ESAIM Control Optim. Calc. Var.* **22** (2016), 267–288. DOI: <http://dx.doi.org/10.1051/cocv/2015003>.
- [68] Existence results for incompressible magnetoelasticity. (with. U. Stefanelli and J. Zeman). *Discrete Cont. Dyn. Systems* **35** (2015), 2615–2623.
- [69] \mathcal{A} -quasiconvexity and weak lower semicontinuity of integral functionals. (with J. Krämer, S. Krömer, and G. Pathó) *Adv. Calc. Var.* **10** (2017), 49–67. DOI: 10.1515/acv-2015-0009.
- [70] Plastic deformation treated as material flow through adjustable crystal lattice. (with P. Minakowski, J. Hron, J. Kratochvíl, J. Málek) IOP Conf. Series: Materials Science and Engineering **63** (2014) 012130 doi:10.1088/1757-899X/63/1/012130.

- [71] Boundary effects and weak* lower semicontinuity for signed integral functionals on BV. (with B. Benešová and S. Krömer). *ESAIM Control Optim. Calc. Var.* **21** (2015), 513–534.
- [72] Quasistatic evolution of magnetoelastic thin films via dimension reduction. (with U. Stefanelli and C. Zanini). Preprint arXiv:1405.6887 *Disc. Cont. Dyn. Systems* **35** (2015), 5999–6013.
- [73] Computations of quasiconvex hulls of isotropic sets. (with S. Heinz) *J. Convex Anal.* **24** (2017), 477–492.
- [74] A crystal plasticity model for a formation of a deformation band structure. (with J. Kratochvíl) *Phil. Mag.* **95** (2015), 3621–3639.
- [75] A sharp interface evolutionary model for shape memory alloys. (with H. Knüpfer). *Zeit. Angew. Math. Mech.* **96** (2016), 1347–1355.
- [76] Statistically motivated model of mechanisms controlling evolution of deformation band substructure. (with J. Kratochvíl) *Int. J. Plasticity* **81** (2016), 196–208.
- [77] Semi-definite relaxations for optimal control problems with oscillation and concentration effects. (with M. Claeys and D. Henrion) *ESAIM Control Optim. Calc. Var.* **23** (2017), 95–117.
- [78] Computational modeling of magnetic hysteresis with thermal effects. (with J. Valdman) *Mathematics and Computers in Simulation* **145** (2018), 90–105. <https://doi.org/10.1016/j.matcom.2017.03.004>.
- [79] Weak lower semicontinuity of integral functionals and applications. (with B. Benešová). *SIAM Review* **59** (2017), 703–766. DOI. 10.1137/16M1060947.
- [80] Generalized $W^{1,1}$ -Young measures and relaxation of problems with linear growth. (with M. Baia and S. Krömer). *SIAM J. Math. Anal.* **50** (2018), 1076–1119.
- [81] On the existence of minimisers for strain-gradient single-crystal plasticity. (with K. Anguige and P. Dondl) *Zeit. Angew. Math. Mech.* **98** (2018), 431–447. DOI. 10.1002/zamm.201700032.
- [82] Weak lower semicontinuity by means of anisotropic parametrized measures. (with A. Kałamajska and S. Krömer) Preprint arXiv:1704.00368. *Trends in Applications of Mathematics to Mechanics* (eds.: E. Rocca, U. Stefanelli, L. Truskinovsky, and A. Visintin), Springer INdAM Series **27**, Springer Cham, Switzerland (2018), pp. 23–52.
- [83] On the passage from nonlinear to linearized viscoelasticity. (with M. Friedrich) Preprint arXiv:1705.06438. *SIAM J. Math. Anal.* **50** (2018), 4426–4456.
- [84] A note on locking materials and gradient polyconvexity. (with B. Benešová and A. Schlömerkemper). Preprint arXiv:1706.04055. *Math. Mod. Meth. Appl. Sci. (M3AS)* **28** (2018), 2367–2401. <https://doi.org/10.1142/S0218202518500513>.
